A Flexible Workstation **Designed for Comfort**

Free up desk space, adjust monitors, and get moving at your workstation so that you can work in comfort and increase productivity.

Sitting less and standing more has tremendous benefits to overall health and productivity, including less back and neck pain and reduced MSDs (musculoskeletal disorders).

The best solution for standing more is a sit-to-stand workstation that lets you change your position throughout the day.

Musculoskeletal disorders & cases accounted for **33%** of all worker injury and illness cases¹

Estimated direct cost of absenteeism in CA/US/UK was 16.6 billion in 2012²

For every 100 employees, MSDs cost employers about \$103,000 annually³

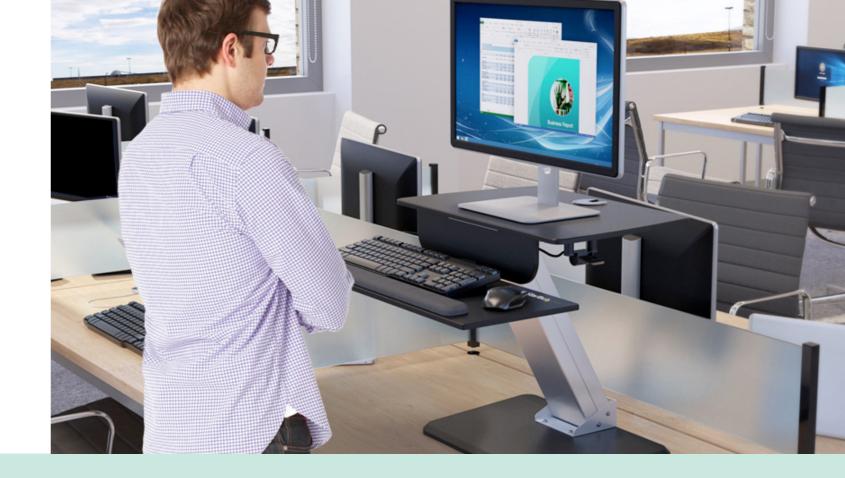

Mount a display with a **monitor arm** for easy

movement and adjustment. ARMDUAL

Get monitors up and off your desk to free up work space. Whether in a cubicle or an office, we've got the solution to create a clutter-free and comfortable workstation.

Cubicle Hanger Monitor Mount
